

Multiplying integers — ANSWER KEY

Multiply. Decide the sign of the answer first.

1. $2 \times (-3) = \underline{-6}$

2. $-4 \times 6 = \underline{-24}$

3. $-8 \times (-10) = \underline{80}$

4. $-10 \times (-10) = \underline{100}$

5. $2 \times (-7) = \underline{-14}$

6. $-7 \times 8 = \underline{-56}$

7. $-4 \times 10 = \underline{-40}$

8. $-9 \times (-10) = \underline{90}$

9. $-11 \times (-7) = \underline{77}$

10. $-4 \times 9 = \underline{-36}$

11. $-9 \times (-9) = \underline{81}$

12. $-12 \times (-9) = \underline{108}$

13. $-11 \times 9 = \underline{-99}$

14. $7 \times (-11) = \underline{-77}$

15. $-9 \times (-6) = \underline{54}$

16. $6 \times (-9) = \underline{-54}$

17. $-2 \times 7 = \underline{-14}$

18. $-7 \times 4 = \underline{-28}$

19. $7 \times (-6) = \underline{-42}$

20. $9 \times (-6) = \underline{-54}$

21. $10 \times (-6) = \underline{-60}$

22. $-3 \times 3 = \underline{-9}$

23. $9 \times (-10) = \underline{-90}$

24. $-9 \times (-4) = \underline{36}$
