

Multiplying integers — ANSWER KEY

Multiply. Decide the sign of the answer first.

1. $5 \times (-7) = \underline{-35}$

2. $-9 \times 10 = \underline{-90}$

3. $-5 \times (-10) = \underline{50}$

4. $-10 \times 2 = \underline{-20}$

5. $-6 \times (-11) = \underline{66}$

6. $-8 \times (-11) = \underline{88}$

7. $-4 \times 3 = \underline{-12}$

8. $-4 \times (-5) = \underline{20}$

9. $-12 \times (-12) = \underline{144}$

10. $-10 \times 11 = \underline{-110}$

11. $-12 \times 6 = \underline{-72}$

12. $-3 \times (-12) = \underline{36}$

13. $-3 \times (-3) = \underline{9}$

14. $4 \times (-6) = \underline{-24}$

15. $-8 \times (-10) = \underline{80}$

16. $10 \times (-2) = \underline{-20}$

17. $-5 \times (-6) = \underline{30}$

18. $4 \times (-7) = \underline{-28}$

19. $7 \times (-8) = \underline{-56}$

20. $-9 \times 12 = \underline{-108}$

21. $-11 \times 8 = \underline{-88}$

22. $-6 \times (-6) = \underline{36}$

23. $-10 \times (-2) = \underline{20}$

24. $-11 \times (-2) = \underline{22}$
