

Fraction times fraction

Multiply. Write the answer in simplest form.

$$1. \frac{1}{4} \times \frac{1}{6} = \underline{\frac{1}{24}}$$

$$2. \frac{11}{12} \times \frac{11}{12} = \underline{\frac{121}{144}}$$

$$3. \frac{1}{5} \times \frac{1}{12} = \underline{\frac{1}{60}}$$

$$4. \frac{9}{10} \times \frac{1}{2} = \underline{\frac{9}{20}}$$

$$5. \frac{1}{6} \times \frac{2}{3} = \underline{\frac{1}{9}}$$

$$6. \frac{1}{2} \times \frac{1}{2} = \underline{\frac{1}{4}}$$

$$7. \frac{3}{10} \times \frac{1}{10} = \underline{\frac{3}{100}}$$

$$8. \frac{4}{5} \times \frac{5}{12} = \underline{\frac{1}{3}}$$

$$9. \frac{3}{8} \times \frac{4}{5} = \underline{\frac{3}{10}}$$

$$10. \frac{1}{6} \times \frac{1}{10} = \underline{\frac{1}{60}}$$

$$11. \frac{3}{4} \times \frac{2}{3} = \underline{\frac{1}{2}}$$

$$12. \frac{3}{10} \times \frac{5}{6} = \underline{\frac{1}{4}}$$

$$13. \frac{11}{12} \times \frac{1}{2} = \underline{\frac{11}{24}}$$

$$14. \frac{4}{5} \times \frac{3}{10} = \underline{\frac{6}{25}}$$

$$15. \frac{5}{8} \times \frac{2}{3} = \underline{\frac{5}{12}}$$

$$16. \frac{1}{3} \times \frac{7}{10} = \underline{\frac{7}{30}}$$

$$17. \frac{1}{12} \times \frac{1}{12} = \underline{\frac{1}{144}}$$

$$18. \frac{5}{6} \times \frac{1}{4} = \underline{\frac{5}{24}}$$
